

Solanco elementary school teachers are working to develop activities and resources to share with students. Each teacher is reaching out to families this week to gather information about the best way for families to access these resources. Many teachers are using email to communicate with parents and families. Please take a minute to check your email, including your junk email box, for a message from your child's teacher. Some teachers may make phone calls to families, and the phone number on caller id may show up as an out of state number. We appreciate your help as we develop the plans for next week. Thank you for your continued support. Beginning Monday March 30th, Solanco Elementary teachers will be sharing activities and resources for the week with students.
