

March 16 Update

This letter serves as an update on the Solanco School District's response to the COVID-19 (coronavirus) health issue.

We are consistently receiving guidance for the Pennsylvania Department of Health and other agencies as we vigilantly monitor this situation.

While our first response focused on healthy habits for students, our response progressed to social distancing before Governor Wolf closed schools for two weeks.

We are currently closed for two weeks, from March 16th through the 27th.

We are currently working on the following:

- Gauging the feasibility of remote forms of instruction.
- Reviewing methods for providing meals to students during the period schools are closed.

There are certainly a number of unanswered questions; we will provide updates regarding school operations as they become available.

Thank you for your support—stay healthy!
